Kami

design by C. Cattaneo

Un gesto che ricorda la cultura orientale degli origami e che ne diventa espressione contemporanea. Attraverso un'unica piegatura e un taglio diagonale sapientemente disegnato, Kami è in grado di celare la fonte luminosa per lasciare spazio ad una sfumatura di luce che diventa così la vera protagonista di questo prodotto scultoreo. La doppia cromia tra esterno ed interno enfatizza l'effetto luminoso e rende la lampada personalizzabile e adattabile a qualsiasi ambiente. La collezione, composta da lampade a sospensione disponibili in due dimensioni, è completata da una versione a parete.

A gesture reminding the Eastern culture of the origami, becoming its contemporary expression. Thanks to its unique bending and its wisely designed diagonal cut, Kami is able to conceal the light source leaving space to hues of light: real protagonists of this sculpted product. The double tone between inside and outside emphasises the luminous effect. In this way the light can be customized, becoming suitable for any environment. The collection, made up of pendant lights available in two sizes, is integrated by a wall variation.

Eine Geste, die an die orientalische Kultur des Origami erinnert und zu seinem zeitgenössischen Ausdruck wird. Durch eine einzige Falte und einen raffiniert gestalteten Schrägschnitt kann Kami die Lichtquelle verstecken, um Platz für eine Lichtnuance zu schaffen, die zum eigentlichen Protagonisten dieses skulpturalen Produkts wird. Die doppelte Farbgebung zwischen Außen und Innen unterstreicht die Lichtwirkung und macht die Leuchte anpassbar und anpassungsfähig an jede Umgebung. Die Kollektion, bestehend aus Pendelleuchten in zwei Größen, wird durch eine Wandversion ergänzt.

Well

design by C. Cattaneo

La luce è movimento: dall'alba al crepuscolo l'universo si trasforma in configurazioni luminose sempre diverse a seconda degli orari del giorno. Well è in grado di modificare la luce emessa grazie ad un semplice gesto che trasforma il suo fascio da diretto a indiretto, modificando la percezione dello spazio circostante e adattando il tipo di luce a specifici bisogni. Un cilindro principale con funzione diffondente e un cilindro inferiore che contiene la sorgente led, sono le componenti essenziali di questa lampada che appare come un lucernario all'interno degli ambienti, adattandosi con naturalezza alle più svariate esigenze di utilizzo.

Light is movement: from sunrise to sunset the universe turns into always different luminous configurations depending on the time of the day. Well is able to adjust the light released thanks to a simple gesture that converts its beam of light from direct to indirect, modifying the sense of the surrounding space and adjusting the light to specific needs. A main cylinder with a diffusing function and a lower cylinder holding the LED source are the essential components of this light that appears as a skylight in an environment, masterly complying with the most varied needs.

Licht ist Bewegung: Von morgens bis abends verwandelt sich das Universum in leuchtende Konfigurationen, die je nach Tageszeit immer unterschiedlich sind. Well ist in der Lage, das ausgestrahlte Licht durch eine einfache Geste zu verändern, die seinen Strahl von direkt auf indirekt umwandelt, die Wahrnehmung des umgebenden Raumes verändert und die Art des Lichts an die spezifischen Bedürfnisse anpasst. Ein Hauptzylinder mit Diffusionsfunktion und ein unterer Zylinder mit der LED-Quelle sind die folgenden wesentliche Bestandteile dieser Lampe, die wie ein Oberlicht in den Räumen aussieht und sich natürlich an die unterschiedlichsten Nutzungsbedürfnisse anpasst.

Nassa

design by A. Barra

La lampada Nassa sospensione rappresenta un'eccellente sintesi tra arte geometrica e illuminazione moderna. Realizzata in metallo tagliato al laser, assume la forma di una rete intricata che avvolge la sfera, creando una cupola unica e suggestiva.

Disponibile in due dimensioni, con diametri di 60 cm e 80 cm, la Nassa offre opzioni per adattarsi a diverse dimensioni di spazi. La geometria intricata della cupola consente una distribuzione uniforme della luce LED, creando un effetto di illuminazione suggestivo.

La scelta di colori tra bianco, nero e sabbia offre flessibilità nel coordinare la lampada con l'estetica dell'ambiente circostante. Il bianco conferisce un'eleganza luminosa, il nero aggiunge un tocco di modernità, mentre la sabbia crea un'atmosfera calda e accogliente.

La Nassa sospensione è un'opzione di illuminazione contemporanea che va oltre la funzionalità, trasformando lo spazio con il suo design artistico. La combinazione di metallo tagliato al laser e illuminazione LED la rende non solo una fonte di luce, ma anche un elemento decorativo d'effetto che cattura lo sguardo e aggiunge un tocco distintivo a qualsiasi ambiente.

The Nassa suspension lamp represents an excellent synthesis of geometric art and modern lighting. Made of laser-cut metal, it takes the form of an intricate net that wraps around the sphere, creating a unique and striking dome.

Available in two sizes, with diameters of 60 cm and 80 cm, the Nassa offers options to suit different sizes of spaces. The dome's intricate geometry allows for an even distribution of LED light, creating a striking lighting effect.

The choice of colours between white, black and sand offers flexibility in coordinating the lamp with the aesthetics of its surroundings. White lends a luminous elegance, black adds a modern touch, while sand creates a warm and welcoming atmosphere.

The Nassa pendant is a contemporary lighting option that goes beyond functionality, transforming the space with its artistic design. The combination of laser-cut metal and LED lighting makes it not only a source of light, but also a striking decorative element that catches the eye and adds a distinctive touch to any room.

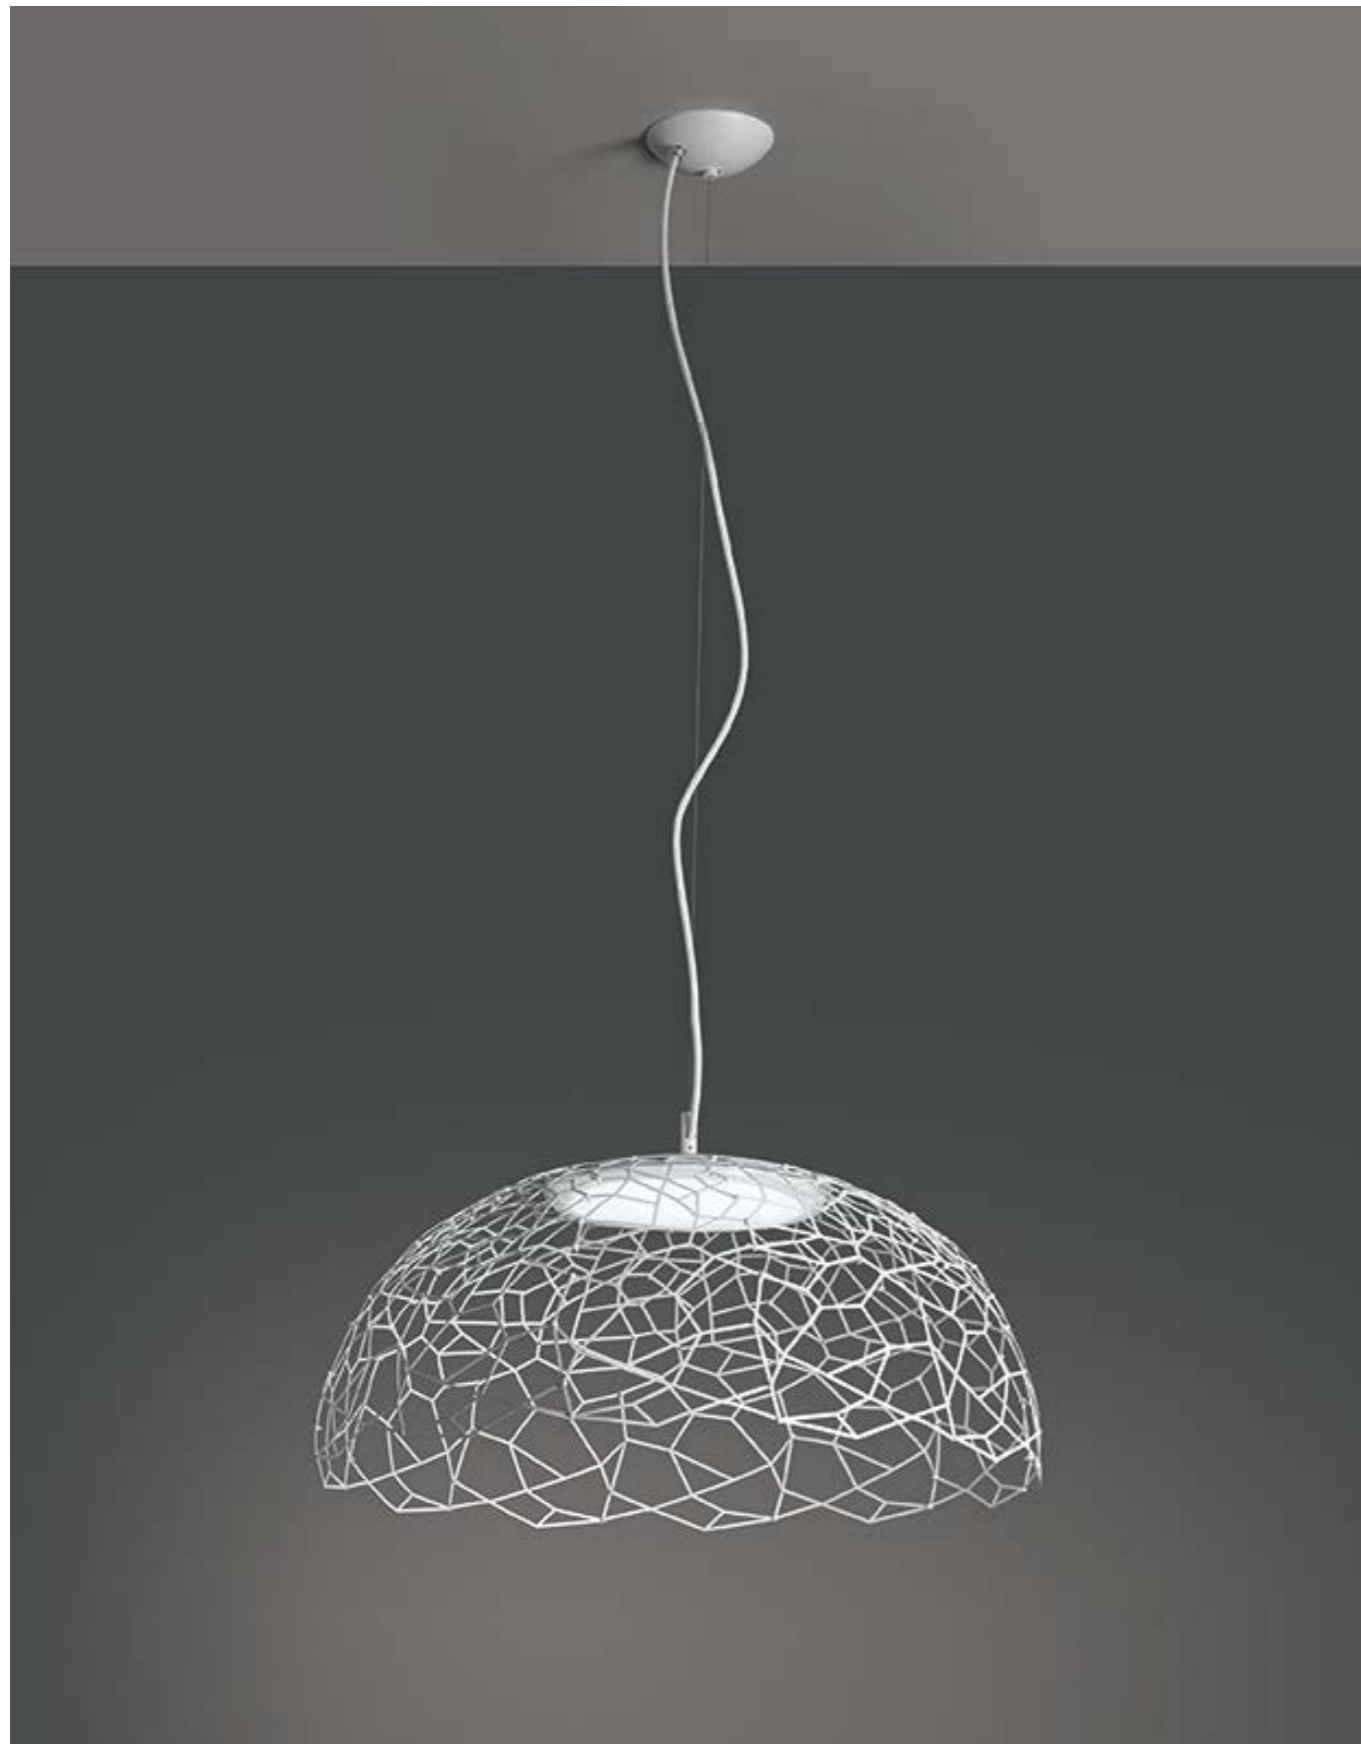

Die Nassa Pendelleuchte stellt eine hervorragende Synthese aus geometrischer Kunst und moderner Beleuchtung dar. Sie besteht aus lasergeschnittenem Metall und hat die Form eines verschlungenen Netzes, das sich um die Kugel wickelt und so eine einzigartige und eindrucksvolle Kuppel bildet.

Nassa ist in zwei Größen mit Durchmessern von 60 cm und 80 cm erhältlich und bietet so die Möglichkeit, sich an unterschiedliche Raumgrößen anzupassen. Die ausgeklügelte Geometrie der Kuppel ermöglicht eine gleichmäßige Verteilung des LED-Lichts, wodurch ein eindrucksvoller Lichteffekt entsteht.

Die Farbauswahl zwischen Weiß, Schwarz und Sand bietet Flexibilität bei der Abstimmung der Leuchte auf die Ästhetik der Umgebung. Weiß verleiht ihr eine leuchtende Eleganz, Schwarz verleiht ihr einen modernen Touch, während Sand eine warme und einladende Atmosphäre schafft.

Die Nassa Pendelleuchte ist eine zeitgenössische Beleuchtungsoption, die über die Funktionalität hinausgeht und den Raum durch ihr künstlerisches Design verwandelt. Die Kombination aus lasergeschnittenem Metall und LED-Beleuchtung macht sie nicht nur zu einer Lichtquelle, sondern auch zu einem auffälligen dekorativen Element, das die Blicke auf sich zieht und jedem Raum eine besondere Note verleiht.

Basalt

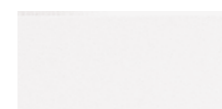

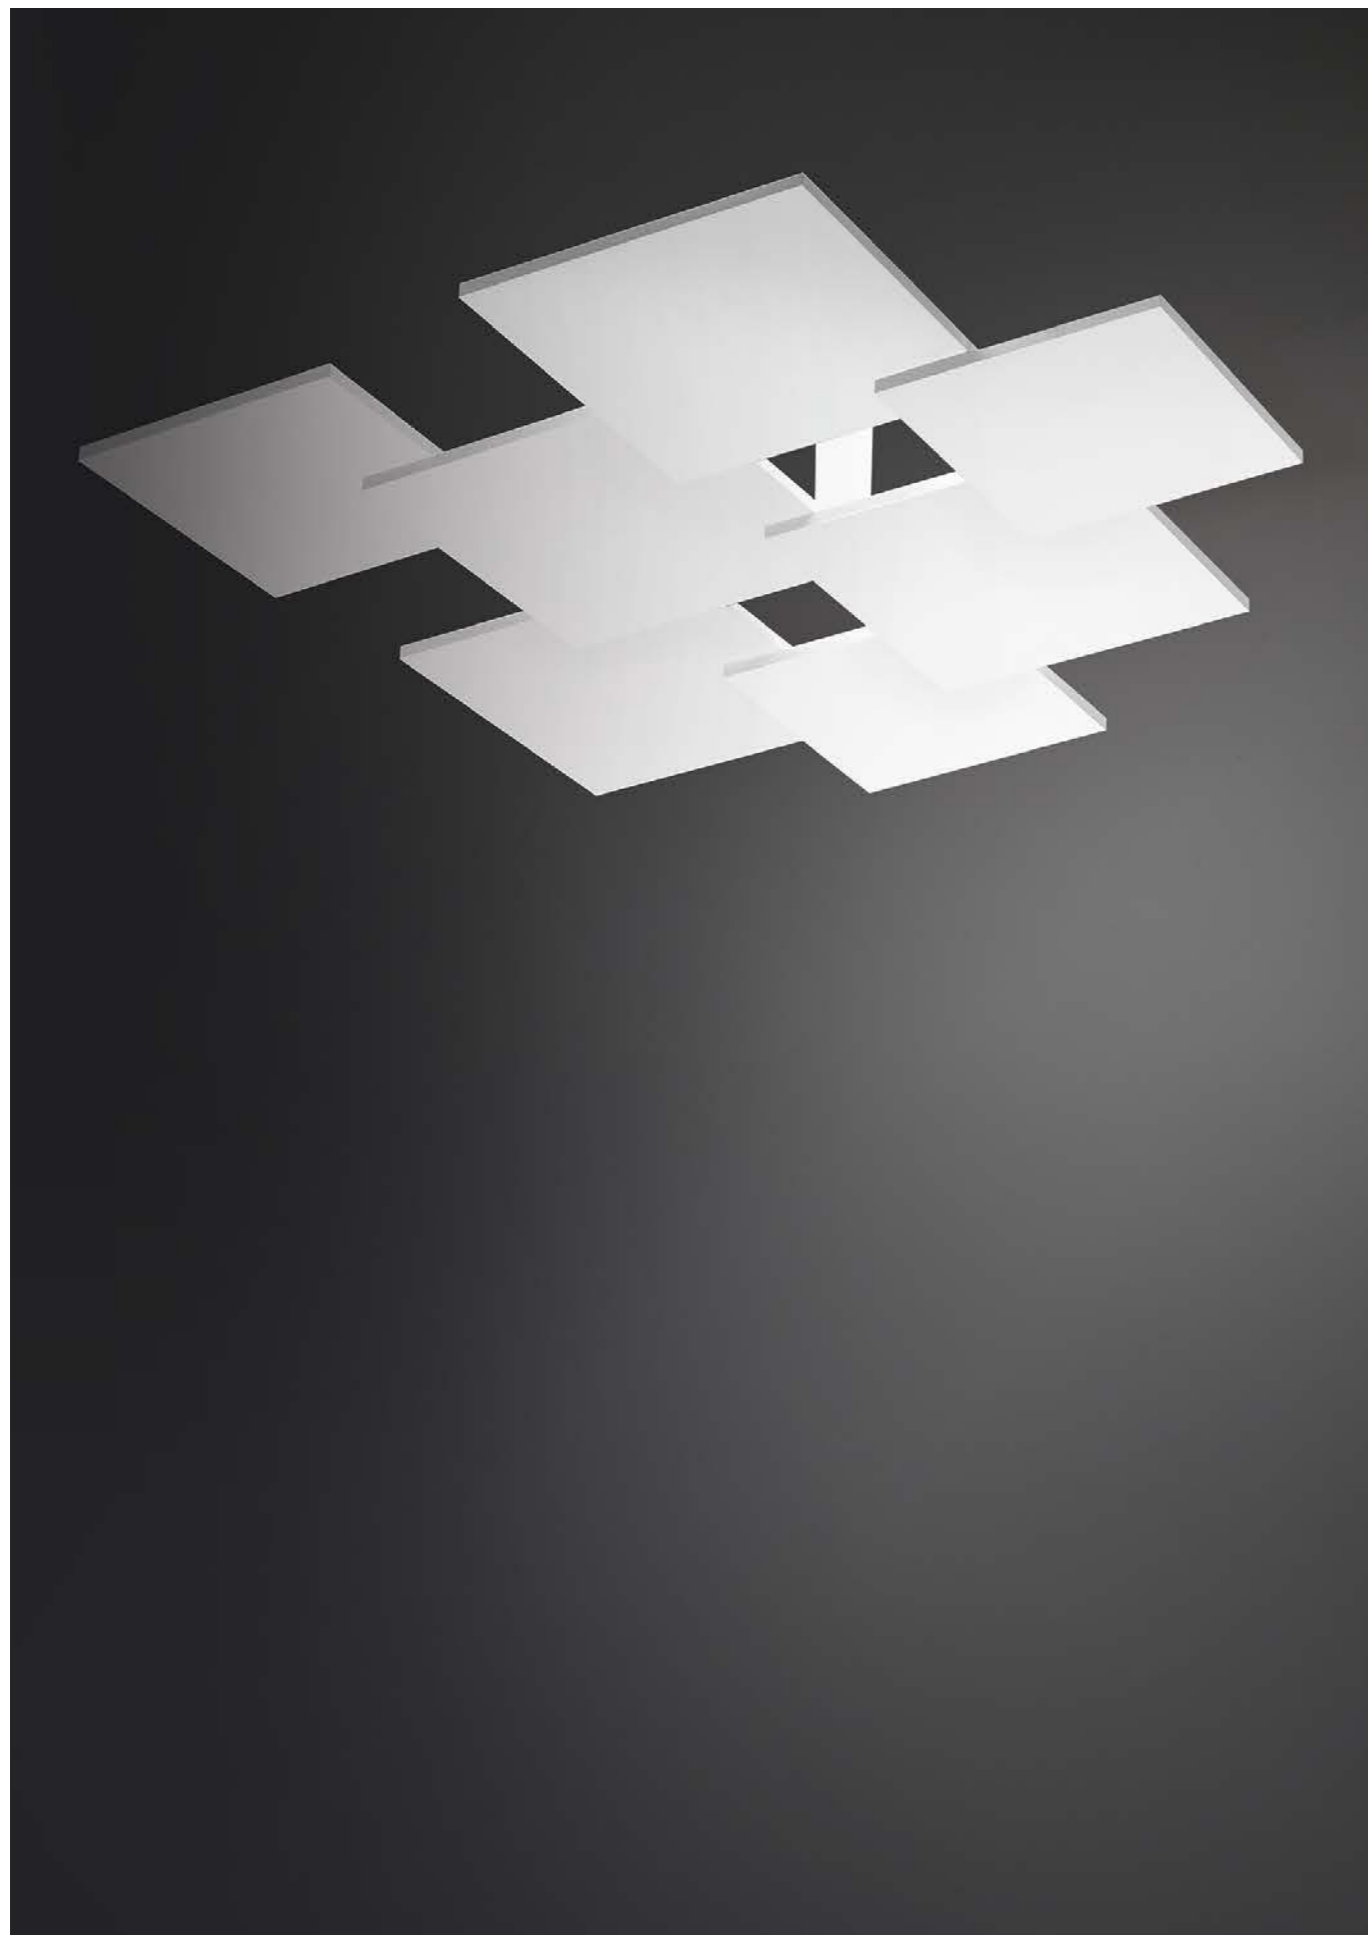

design by C. Cattaneo

Una stratificazione di livelli geometrici costituisce la forma della lampada Basalt, plafoniera in grado di mimetizzarsi nello spazio ma allo stesso tempo di arricchirlo con una tridimensionalità inattesa. Concepita assemblando elementi geometrici primari, Basalt produce una luce indiretta e trasforma la superficie in cui viene installata in diffusore capace di illuminare lo spazio in modo omogeneo ed elegante, creando sempre un'atmosfera adatta ad ogni esigenza.

A stratification of geometrical layers makes up the shape of Basalt, a ceiling light able to camouflage itself in the space, but at the same time to enhance the environment with an unexpected three-dimensional effect. Basalt has been conceived assembling primary geometrical elements. It casts an indirect light that turns the surface into a diffuser able to illuminate the space homogeneously and gracefully, creating the perfect atmosphere for all needs.

Eine Schichtung geometrischer Ebenen bildet die Form der Basaltlampe, einer Deckenleuchte, die sich im Raum tarnen, aber gleichzeitig mit einer unerwarteten Dreidimensionalität bereichern kann. Basalt wurde durch die Montage von primären geometrischen Elementen entwickelt, erzeugt indirektes Licht und verwandelt die Oberfläche, in der es installiert ist, in einen Diffusor, der in der Lage ist, den Raum homogen und elegant zu beleuchten und immer eine für jeden Bedarf geeignete Atmosphäre zu schaffen.

Ninfea

design by C. Cattaneo

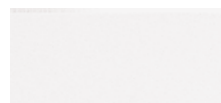

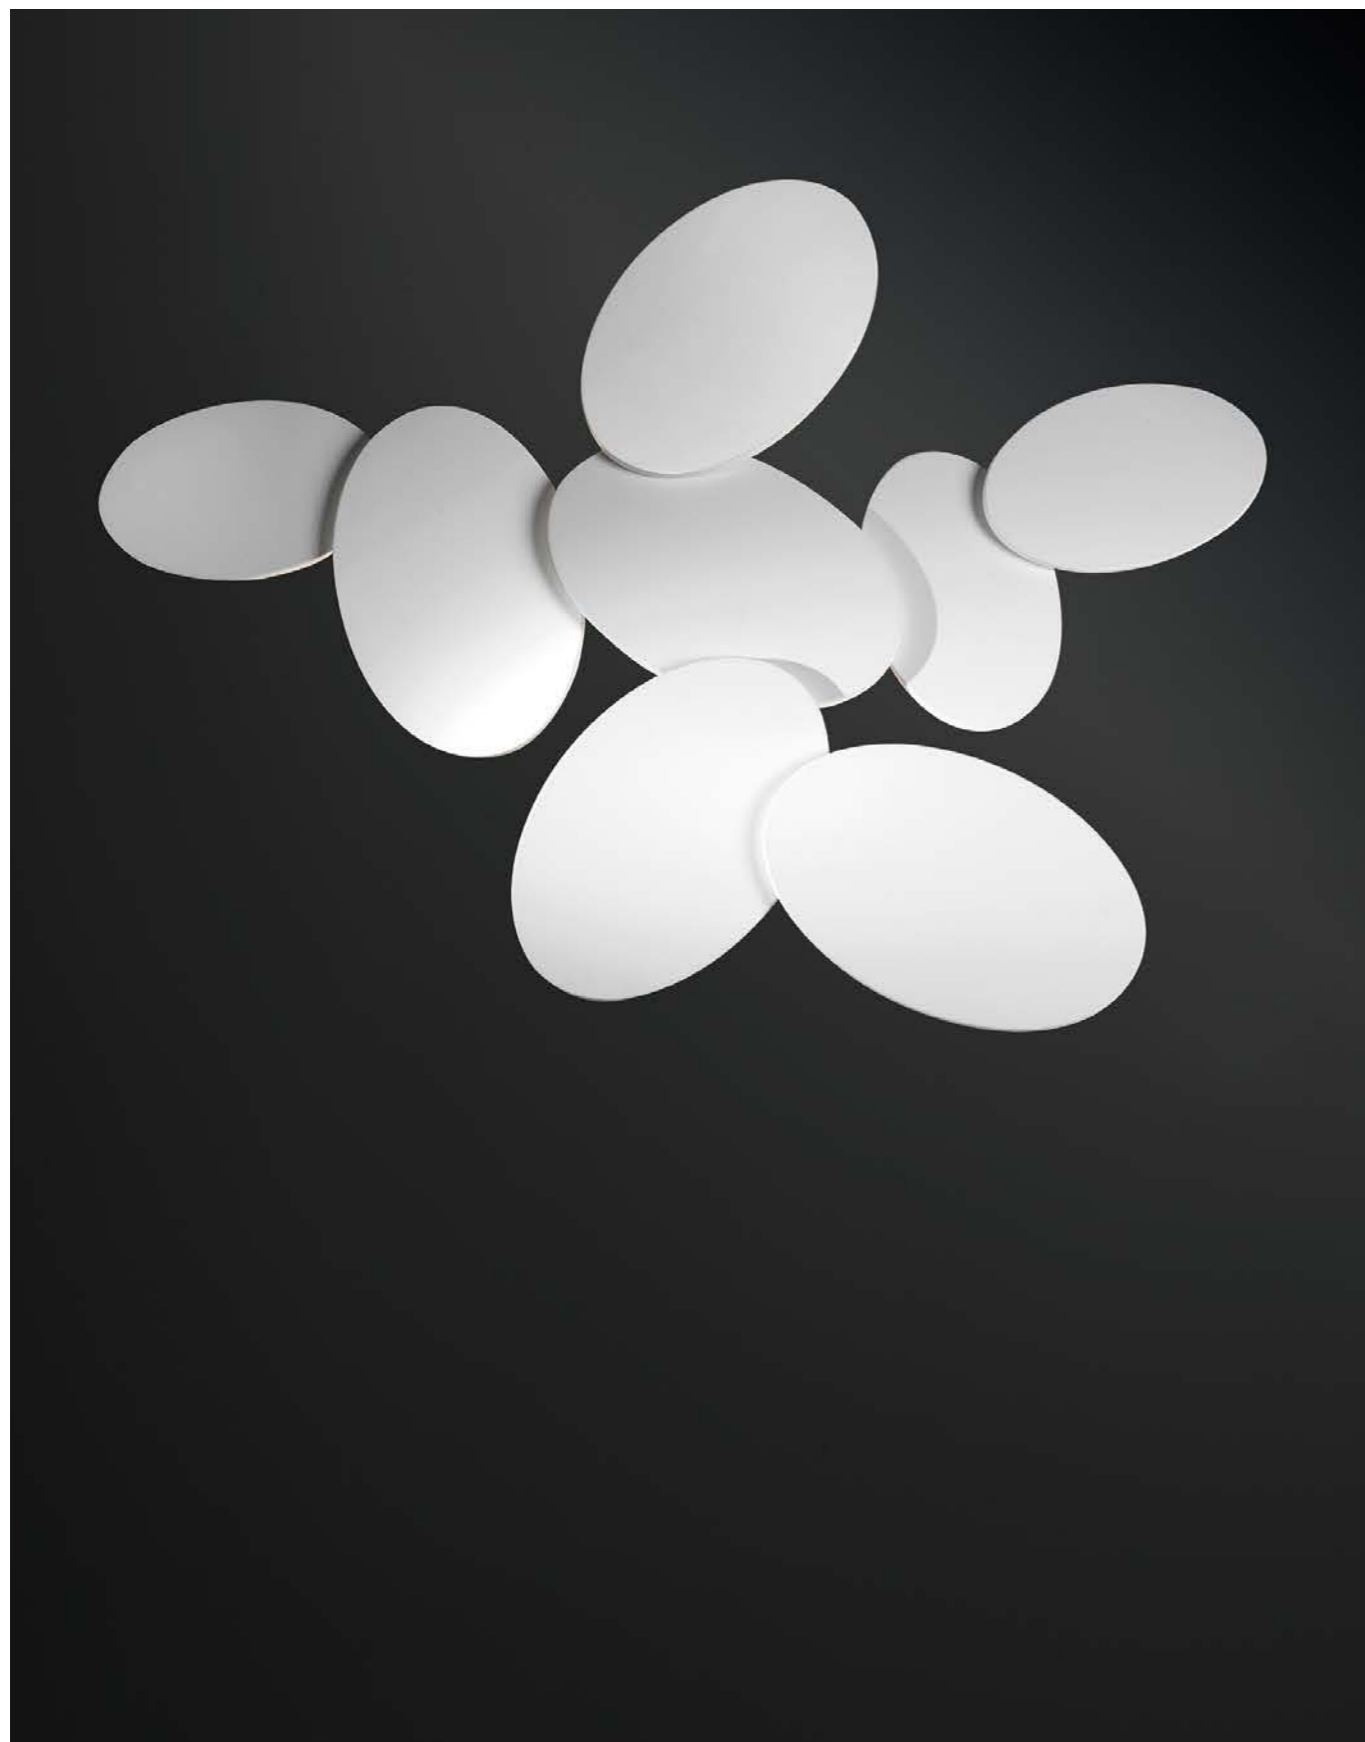

Una sovrapposizione di forme curve compone questa lampada che, come le foglie di una ninfea, si appoggia leggera sulla superficie in cui viene installata. Ninfea emana una luce indiretta che illumina gli spazi con morbidezza creando dinamiche atmosfere chiaroscurali grazie alla possibilità di aumentare o diminuire l'intensità di luce emessa. La sua presenza non invasiva permette a Ninfea di dialogare con l'ambiente circostante divenendo parte integrante dell'interior design. Un prodotto con tecnologia led che coniuga qualità, design e artigianalità.

This light is made up of an overlapping of curved shapes that, as the leaves of a water lily, lean lightly into the surface on which they are installed. Ninfea releases an indirect light that enlightens the space with softness, creating dynamic light and dark atmospheres, thanks to the chance of increasing and decreasing the intensity of light. Its non-invasive presence, allows Ninfea to converse with the surrounding environment becoming integral part of the interior design. A product with LED technology combining quality, design and craftsmanship.

Eine Überlagerung von geschwungenen Formen bildet diese Lampe, die wie die Blätter einer Seerose leicht auf der Oberfläche liegt, auf der sie installiert ist. Ninfea emittiert ein indirektes Licht, das die Räume weich ausleuchtet und dank der Möglichkeit, die Intensität des emittierten Lichts zu erhöhen oder zu verringern, dynamische Hell-Dunkel-Atmosphären erzeugt. Seine nicht-invasive Präsenz ermöglicht es Ninfea, mit der Umgebung zu kommunizieren und wird so zu einem integralen Bestandteil der Innenarchitektur. Ein Produkt mit LED-Technologie, das Qualität, Design und Handwerk vereint.

Realizzata con alluminio di alta qualità, la struttura della lampada Biquadro emana solidità e stile contemporaneo.

Ma ciò che la distingue è la sua parte centrale basculante, un'innovazione che permette di regolare la luce tra diretta e indiretta, offrendo una flessibilità luminosa senza pari. La lampada Biquadro offre una luce indiretta costante grazie ai LED posizionati nel bordo della parte non basculante. Questa luce soffusa contribuisce a creare un'atmosfera accogliente e avvolgente, anche quando la parte centrale è inclinata per fornire luce diretta. Quando inclinata verso il basso, la parte centrale della lampada consente una luce diretta, ideale per concentrare l'illuminazione su una zona specifica come un tavolo da pranzo o una scrivania.

Al contrario, quando inclinata verso l'alto, la lampada diffonde una luce indiretta supplementare, amplificando l'effetto avvolgente nell'ambiente circostante. La lampada a sospensione Biquadro non solo aggiunge un tocco di raffinatezza e modernità al tuo spazio, ma offre anche una soluzione luminosa adattabile alle tue esigenze e preferenze. Sia che tu stia cercando di illuminare una zona specifica o di creare un'atmosfera accogliente in tutta la stanza, Biquadro si rivela una scelta impeccabile per un design intelligente e una funzionalità senza compromessi.

Explore the perfect balance of innovative design and versatile functionality with the Biquadro pendant lamp. Characterised by an elegant and minimalist square shape, this lamp is an ode to modernity and practicality. Made of high-quality aluminium, the structure of the Biquadro lamp exudes solidity and contemporary style.

But what sets it apart is its pivoting central part, an innovation that allows the light to be adjusted between direct and indirect, offering unparalleled lighting flexibility. The Biquadro lamp offers constant indirect light thanks to LEDs positioned in the edge of the non-tilting part. This soft light contributes to a cosy, enveloping atmosphere, even when the central part is tilted to provide direct light. When tilted downwards, the central part of the lamp provides direct light, ideal for concentrating illumination on a specific area such as a dining table or desk.

Conversely, when tilted upwards, the lamp diffuses additional indirect light, amplifying the enveloping effect in the surroundings. Whether you are looking to illuminate a specific area or to create a cosy atmosphere in the whole room, Biquadro proves to be an impeccable choice for intelligent design and uncompromising functionality.

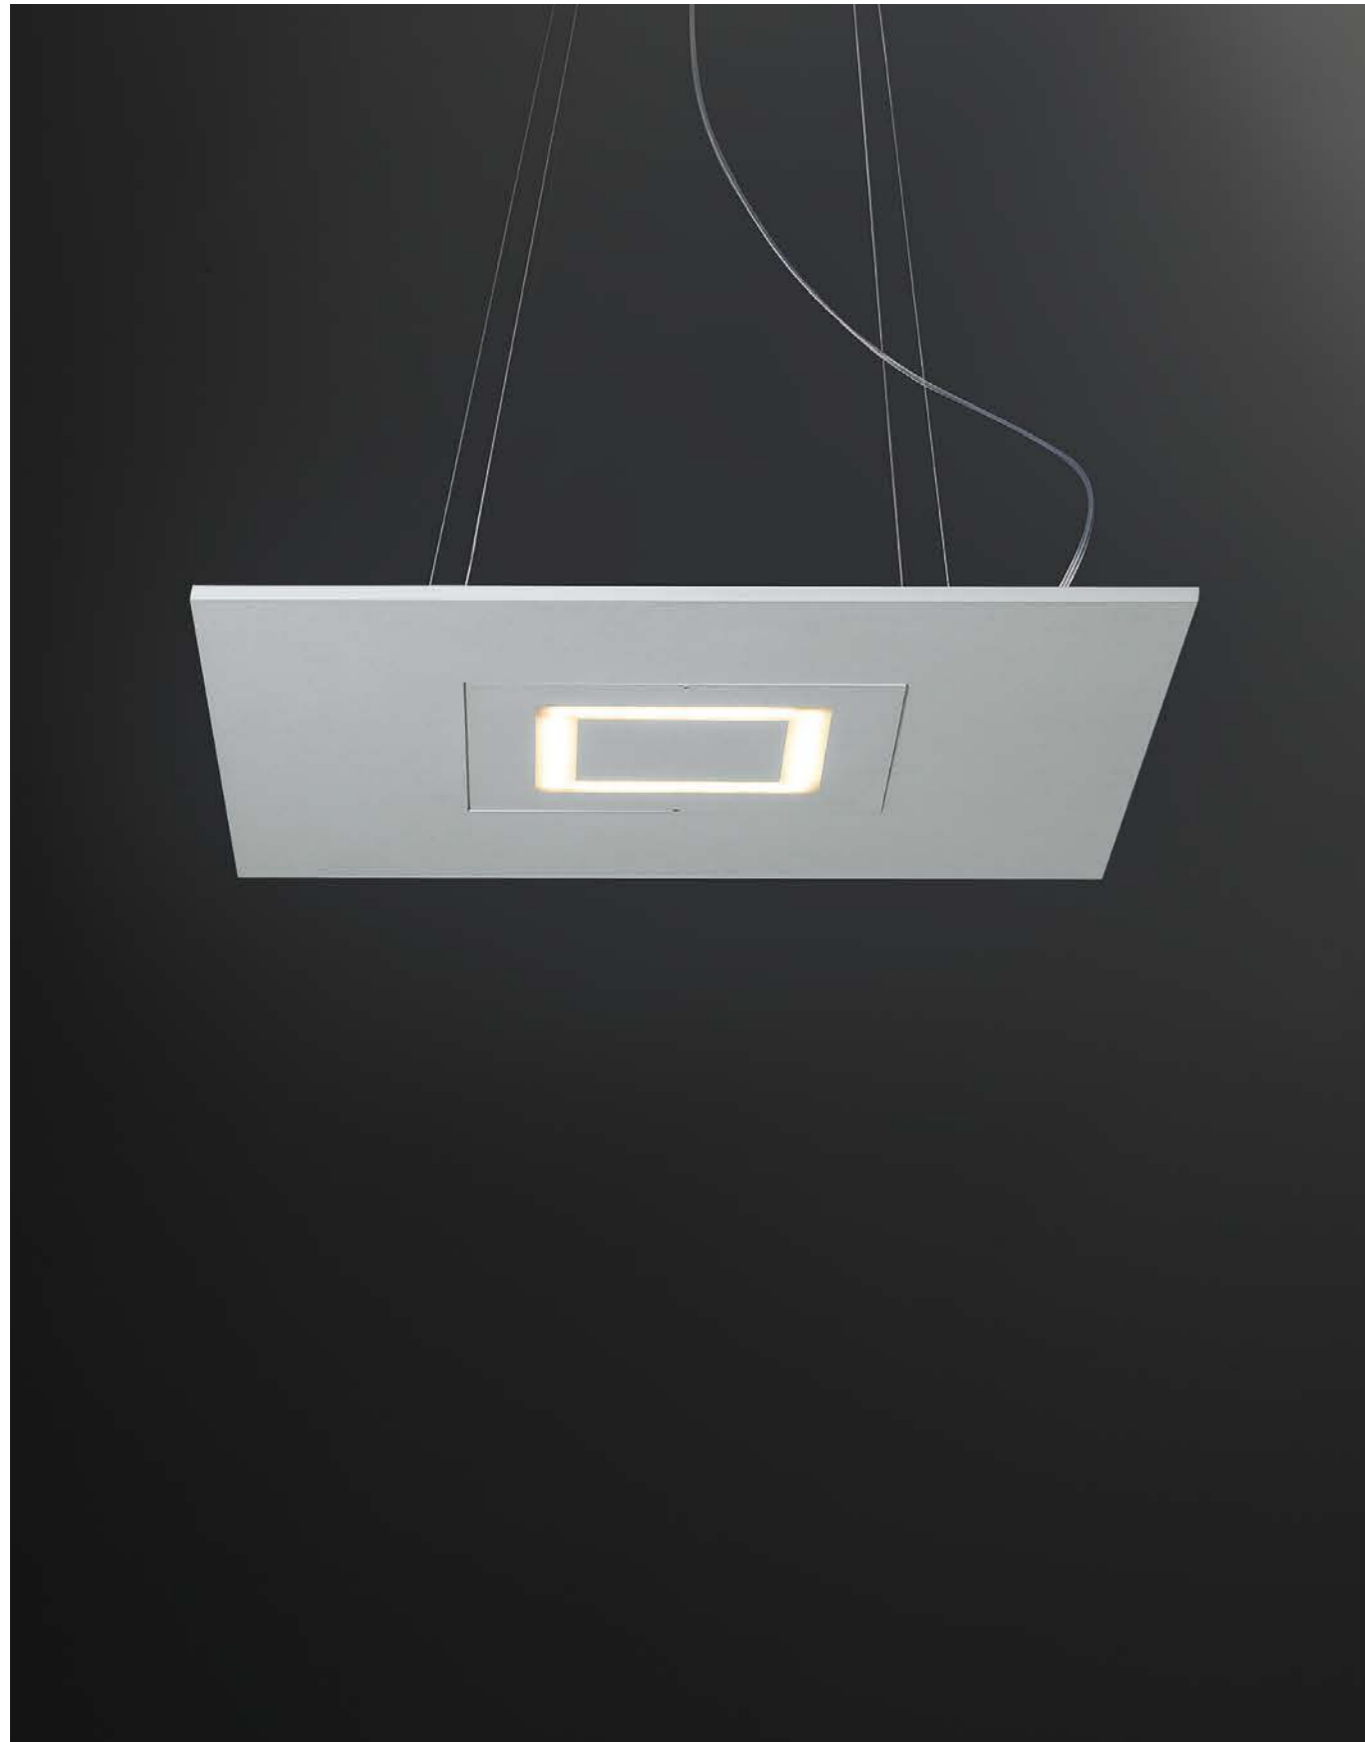

Entdecken Sie das perfekte Gleichgewicht aus innovativem Design und vielseitiger Funktionalität mit der Pendelleuchte Biquadro. Mit ihrer eleganten und minimalistischen quadratischen Form ist diese Leuchte eine Ode an die Modernität und Zweckmäßigkeit. Die aus hochwertigem Aluminium gefertigte Struktur der Biquadro-Lampe strahlt Solidität und zeitgenössischen Stil aus.

Das Besondere an dieser Leuchte ist der drehbare Mittelteil, eine Innovation, die es ermöglicht, das Licht zwischen direktem und indirektem Licht zu wechseln, was eine unvergleichliche Flexibilität bei der Beleuchtung bietet. Die Leuchte Biquadro bietet ein konstantes indirektes Licht dank der LEDs, die am Rand des nicht schwenkbaren Teils angebracht sind. Dieses weiche Licht trägt zu einer gemütlichen, einhüllenden Atmosphäre bei, auch wenn der mittlere Teil für direktes Licht gekippt wird. Wird der mittlere Teil der Leuchte nach unten gekippt, spendet er direktes Licht, das ideal ist, um die Beleuchtung auf einen bestimmten Bereich zu konzentrieren, z. B. auf einen Esstisch oder einen Schreibtisch.

Umgekehrt streut die Leuchte bei einer Neigung nach oben zusätzliches indirektes Licht und verstärkt so die umhüllende Wirkung in der Umgebung. Ganz gleich, ob Sie einen bestimmten Bereich beleuchten oder eine gemütliche Atmosphäre im ganzen Raum schaffen wollen, Biquadro erweist sich als eine tadellose Wahl für intelligentes Design und kompromisslose Funktionalität.

Street Street System

design by C. Cattaneo

La serie Street e Street System rappresentano un'innovativa interpretazione dell'illuminazione, offrendo lampade dal design squadrato o rettangolare che integrano al loro interno lampadine a LED GX53. Ciò che le rende veramente uniche sono le incisioni artistiche nel metacrilato, che, una volta illuminate, creano un effetto scenografico mozzafiato, illuminando attraverso i caratteristici tagli della lampada.

Inoltre, la serie Street System offre un'ulteriore flessibilità grazie alla sua natura componibile. Da un unico punto luce, è possibile creare la propria composizione luminosa, combinando diversi elementi per realizzare configurazioni uniche e personalizzate. Questo permette di adattare l'illuminazione alle esigenze specifiche e alle preferenze estetiche, creando atmosfere suggestive che si integrano armoniosamente con l'ambiente circostante.

Entrambe le serie non solo forniscono un'illuminazione efficiente e di alta qualità, ma anche un'esperienza visiva e artistica che arricchisce l'ambiente. Grazie alla combinazione di tecnologia LED all'avanguardia, design creativo e possibilità di personalizzazione, le lampade della serie Street e Street System rappresentano la scelta ideale per coloro che cercano un'illuminazione che unisca funzionalità, estetica e flessibilità in modo innovativo.

The Street and Street System series represent an innovative interpretation of lighting, offering lamps with a square or rectangular design that incorporate GX53 LED bulbs inside. What makes them truly unique are the artistic engravings in the methacrylate, which, when illuminated, create a breathtaking scenic effect, lighting through the lamp's characteristic cuts.

In addition, the Street System series offers further flexibility thanks to its modular nature. From a single light point, you can create your own lighting composition, combining different elements to create unique and customised configurations. This allows you to adapt the lighting to your specific needs and aesthetic preferences, creating striking atmospheres that blend harmoniously with the surrounding environment.

Both series provide not only efficient and high-quality lighting, but also a visual and artistic experience that enriches the ambience. Combining state-of-the-art LED technology, creative design and customisation possibilities, the Street and Street System series lamps are the ideal choice for those seeking lighting that combines functionality, aesthetics and flexibility in an innovative way.

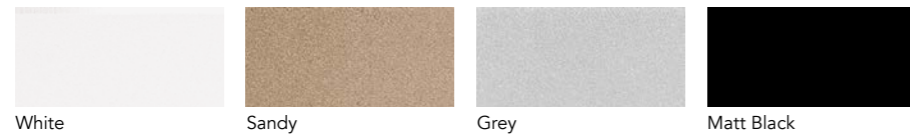

Die Serien Street und Street System stellen eine innovative Interpretation der Beleuchtung dar. Sie bieten Lampen mit quadratischem oder rechteckigem Design, die im Inneren mit GX53 LED-Lampen ausgestattet sind. Was sie wirklich einzigartig macht, sind die kunstvollen Gravuren im Methacrylat, die, wenn sie beleuchtet werden, einen atemberaubenden szenischen Effekt erzeugen, der durch die charakteristischen Schnitte der Lampe leuchtet.

Darüber hinaus bietet die Street System-Serie dank ihres modularen Charakters weitere Flexibilität. Von einem einzigen Lichtpunkt aus können Sie Ihre eigene Beleuchtungskomposition erstellen, indem Sie verschiedene Elemente zu einzigartigen und maßgeschneiderten Konfigurationen kombinieren. So können Sie die Beleuchtung an Ihre spezifischen Bedürfnisse und ästhetischen Vorlieben anpassen und eine eindrucksvolle Atmosphäre schaffen, die sich harmonisch in die Umgebung einfügt.

Beide Serien bieten nicht nur eine effiziente und hochwertige Beleuchtung, sondern auch ein visuelles und künstlerisches Erlebnis, das das Ambiente bereichert. Durch die Kombination von modernster LED-Technologie, kreativem Design und individuellen Anpassungsmöglichkeiten sind die Lampen der Serien Street und Street System die ideale Wahl für alle, die eine Beleuchtung suchen, die Funktionalität, Ästhetik und Flexibilität auf innovative Weise verbindet.
